

VIRTUAL HOST

Taking computing to the next level

Today doing more with less is a priority. Thus, organizations are facing the challenge of making the best use of their resources while reducing their overall costs in the quest to stay competitive in a global market place. Moreover, if the Company wants faster returns on IT Investment, it ought to look out for solutions that can be easily customized according to its needs.

Virtualization of technology is the solution.

The Virtual Host service from Reliance is an infrastructure hosting solution offered on a virtualization platform.

It maximizes hardware investment with better utilization of servers through virtual machines while delivering a seamless, scalable and secure hosting solution to the customer.

FEATURES

- Best of hardware and underlying technology used for virtualization
- An array of security features - so you always stay protected
- Committed CPU resources, RAM and storage space
- Total control and complete access on server
- Flexibility to install software and configure the server
- Managed back-up - quick and seamless
- Value-added managed services such as data transfer shared firewall IP address and unlimited backup

BENEFITS

- Lower total cost of ownership by reducing number of hardware units
- Saves space and power cost
- Better resource utilization
- High availability
- Faster response to business needs
- More efficient disaster recovery
- Better ROI on infrastructure investment
- 24x7x365 support

THE RELIANCE DATA CENTER

We are an ISO 9001:2005, ISO 20000-1:2005 and ISO 27001 certified enterprise. Founded in 2001, Reliance Data Center protects technology infrastructure from disaster for some of the world's most demanding government agencies, Fortune 1000 companies, and IT-dependent firms of all sizes. Its facilities encompass nine large Tier III+ data centers located at Mumbai, Bangalore, Chennai and Hyderabad. With over 650,000 sq. ft. of hosting space, as the largest third party data center service provider in India, it currently manages more than 25,000 servers and 1600 terabytes of data everyday. No wonder, Reliance Data Center handles mission critical IT infrastructure of 700+ top enterprise customers in India and is a clear leader with over 50% market share.
