True XGA Data Projectors

Easy-to-use, sleek and compact, these 3D-ready projectors offer brilliant image quality in an ecologically friendly design for versatile school and business use

SHARP CORPORATION OSAKA, JAPAN

New 3D-ready Sharp projectors offer advanced features, quick and easy operation, and a compact and environmentally friendly design for crystal clear projection in a wide range of business and education applications

High-Quality Picture

NEW

3D Ready

Make sure your projector is ready to be used for new 3D content. Incorporating DLP® Link™ technology, the projector captivates audiences with breathtaking 3D imagery.

High Brightness

Sharp's advanced optoelectronics technology maximizes light output, providing crystal clear images in high brightness of 3500, 3000, 2700 and 2500 lumens for the PG-D3510X, PG-D3010X, PG-D2710X and PG-D2500X, respectively.

3D-ready Specifications

The projector provides 3D support with both 60 Hz and 120 Hz XGA (1,024 x 768) and SVGA (800 x 600) sources (which is compatible with 3D field-sequential content). Active shutter 3D glasses that support the DLP® Link™ system are required (sold separately). For additional information about the DLP® Link™, visit <http://www.dlp.com/projector/dlp-innovations/3d-ready.aspx>

BrilliantColor™ Technology with Six-Segment Colour Wheel*

BrilliantColor™ Technology improves picture brilliance particularly for intermediate colours, providing natural, detailed images. Sharp has also developed a 2x Speed Colour Wheel with six colour segments including yellow and cyan added to red, green, blue, and white. With Sharp's unique colour matching technology and these six colour combinations, images can be reproduced with highly realistic colours.

4-segment colour wheel (red, blue, green, white)

6-segment colour wheel (red, blue, green, yellow, cyan, white)*

* 5-segment colour wheel (red, blue, green, white, cyan) for PG-D3510

DLP® Digital Image

Using a DLP® chip, each pixel is individually composed of one of over a half a million micromirrors to produce a high resolution, and the micromirrors lie

High-Resolution Seamless Image Comparison*

DLP® Aperture Ratio: 90% (PG-D3510X/D3010X/D2710X/D2500X) Aperture Ratio: 60%

at a distance of merely one micron, providing a seamless finely detailed picture. Also, high-speed on/off switching delivers smooth moving scenes.

Convenience and Reliability

Compact File-Size Body

The slim design with 79-mm thickness makes it easy to carry, set up and store. The volume is 12% smaller than conventional models.

Sliding Lens Cover

The lens cover can be slid closed to protect the lens from dust and damage while the projector is not being used. It is possible to completely close the lens cover and interrupt the projection with the power still on. If the lens cover is kept closed for 30 minutes, the projector turns off automatically for safety.

The photos are for the PG-D3510X.

Lamp Replacement System

You can exchange the lamp easily and safely even when the projector is mounted on the ceiling or in another high location.

Safe Lamp Housing Structure

When the lamp is removed from the projector for replacement, the internal lamp shutter door automatically closes, ensuring safe replacement in the event that the lamp breaks.

Filter-Free Design

When the projector is being used, the lamp door remains open, and the lamp heat burns off dust, so there is no need to worry about filter clogging or costs for filter replacement. The sealed DLP chip with filter-free design helps ensure lower maintenance and operating costs.

Security Bar

A reinforcing bar for the antitheft cable is mounted at the corner of the projector for theft prevention.

Easy and Convenient Presentation Operations

1.2x Optical Zoom

The dynamic zoom delivers large-screen projection in a short distance, for example, 100" projection from 3.5 m to 4.2 m. This makes large projection easy in any size of room.

High-Output Speaker

Enjoy clear audio with 7 W of power from videos or other sources without troublesome connections to audio devices.

Quick Start

It takes only approx. 5 seconds to project the image.

Direct Power Off

Direct Power Off lets users unplug the projector and take it from the location without waiting for it to cool down. In addition, it also helps control the power simultaneously for multiple projectors by allowing use of the room's primary power switch and the projector's auto restart function.

Remote Control with GUI Pointer and Spotlight

Five different icons can be displayed to effectively use for your presentations.

Three spotlight sizes, ranging from 1/25, 1/9 or 1/8 the screen, provide visual effects to focus on the specified subject. Also, the remote control range is increased to 10 m, 40% longer than conventional models.

Pointer Icons

Spotlights

- 4:3 and 16:9 Aspect Ratios and HDTV/DTV and DVD Compatible (1080P, 1080i, 720P, 576P, 576i, 540P, 480P and 480i).
- Image Shift Function
Images projected in wide format can be vertically shifted for better viewing in limited spaces.
- Theft Deterrent Function "System Lock"
- Keylock Function
- 30 dB Low Fan Noise (Eco+Quiet Mode)
- Standby power: 0.77 W (Standby Mode: Quick Start)
- Wall Colour Screen Adjustment
For use with whiteboards and blackboards
- 1080i IP conversion

Sharp's Unique Network System*

Web Browser Control

Web browser control enables remote access and management of the projector by utilizing built-in firmware without the need for additional special software.

Link to a Specific Website for Service and Support

The projector can be registered to a specific website for maintenance service and support. For example, the projector can send an error message, such as to notify that the lamp is burnt out, to a web address automatically selected. The address accessed for maintenance is also shown on the display.

Remote Access for Control and Adjustment

Projector control functions, including power on, input select, volume, and AV mute, can be controlled and adjusted by a computer even in another room.

Diagnosis and Auto Email Alert

Email is automatically sent to appointed addresses when detecting an error message, such as the lamp going out, unusual heating or cooling fan breakdown.

Control with Downloadable Display Manager

A greater variety of network projector control options can be used when the Sharp Display Manager* is installed on the main computer.

*Sharp Display Manager can be downloaded from the Sharp Global Home Page for free. Sharp Global Homepage URL: <http://sharp-world.com/projector/>

- Remote Access for Multiple and Group Projector Control
- Periodic/Error Diagnosis and Auto Email Alert
- Theft Detection and Message (Network Surveillance System)

PJLink™ Capability

The PG-D3510X, PG-D3010X and PG-D2710X are compatible with devices that support PJLink™, enabling systems to be easily built for centralized management and operation using a controller. For additional information about the PJLink™, visit <http://pjlink.jbma.or.jp/english/>

Control System Compatibility

The PG-D3510X, PG-D3010X and PG-D2710X provide superior compatibility with various control systems such as Crestron, AMX and Extron.

* PG-D3510X/D3010X/D2710X only
